COURAGEOUS EDVENTURES

J. Magiera

Des Plaines School District 62 (UNITED STATES)

Abstract

Great progress and innovation is made when brave individuals take big risks. As educators we need to be willing to embrace the chance of failure, and make leaps into the unknown for the sake of our students. So how do we suspend doubts, navigate expectations from school systems, parents and leaders while exploring emerging and new technologies? Why is it important to think big in education? In this keynote, Jennie will share stories and examples of how your classroom can be an adventure for you and your students. See how you can discover your own version of classroom innovation.

Keywords: Education adventure, classroom innovation
